Subject Index

A

Absorption 41
Absorption, colonic, Na^+, H^+ 141
Acetylcholine 57
– receptors 171, 213
– release 105
Acetylcholinesterase inhibitors 213
Activation in frog twitch muscle fibers 284
Activators, Na pump in sheep Purkinje fibers 28
Active Na transport 28
Actomyosin ATPase 208
Adenylate cyclase system 178
Afterdischarge 355
After-hyperpolarization neurons 331
Airway conductance 236
Alpha- and beta-adrenoceptor 1
Althesin anaesthesia 49
Alveolar gas 159
Ambient temperature 125
Amiloride 309
Amino acid-induced insulin release 112
– – incorporation 319
Amphiuma means 135
– nephron 129
Amygdala 49
Amygdaloid defence reaction 49
Anaesthesia 49
Angiotensin action 296
Antibody titre 25
Anticholinesterase drug 213
Arterial baroreceptors 231
– hypocapnia 195
– pH 159
– pressure 324
Arteriolar resistances 129
Atrial trabeculae 9
Atrio-ventricular node cell 261
Atrium, staircase phenomenon 9
Autonomic control 74
Autoregulation 147
– of glomerular capillary pressure 135
Auriculo-temporal stimulation 74
Averaging 154
Avian temperature regulation 60
Axonal tree 306

B

Baroreceptors, pulmonary 231
Basolateral membrane 219
Behaving animals 343
Beta-adrenergic drugs 355
Beta-adrenoceptor 1
Biobolical signals 343
Blood flow regulation 195
– perfused isolated dog kidneys 296
Body plethysmography 236
– temperature 314
Bowman's space 129
Brain thermosensitivity 60
– tissue hypoxia 195
Bronchial obstruction 236

C

Caesium 57
Ca-depleted tissues 183
^{45}Ca-fluxes 183
Ca influx 105
Ca-store 183
Ca^{2+} binding sites 105
Ca^{2+} currents 252
Calcium 242
– activation 334
– ions 208
– on quantal unit current 35
Calorigenic action 125
Capillaries 22
Carbachol 74
Carbonic anhydrase inhibition 159
Carbamoylcholine chlorid 213
Cardiac contractility 190
– muscle 208
– output 324
– parasympathetic nerve endings 105
Cardiovascular regulation 49
Carotid sinus nerve 355
Catecholamine-induced vasodilator metabolite release 147
Cell finder 258
– -free membrane patches 85
– membrane permeability 242
– to cell coupling 119
Central chemosensitivity 226
– hypoxic-hypercapnic interaction 289
– nervous system 343
Cerebellar fastigial neurons 267
Cerebral metabolites 195
Chemically sympathectomized rats 324
Chemoreceptor 289
Chemosensitive fields 226
Cimetidine 236
Circadian rhythm 314
Clemastine 236
Cold adaptation 327
– water immersion 81
Colloidal radiogold 353
Colloid osmotic pressure 135
Colon 141, 301
Colonic absorption, Na^+, H^+ 141
Communication network 119
Conductance, depolarizing and hyperpolarizing 242
Contractile properties 200
– proteins 319
Contractility 190, 208
Contraction 183, 334
– coupling 284
– in vascular smooth muscle cells 183
– force measurements 44
– staircase 277
– time 68
Cooling 25
– on ^{45}Ca-exchange 183
Corneal epithelium 258
Coronary circulation 147
– flow autoregulation 101
Coupling, cell to cell 119

Chemically sympathectomized rats 324
Chemoreceptor 289
Chemosensitive fields 226
Cimetidine 236
Circadian rhythm 314
Clemastine 236
Cold adaptation 327
– water immersion 81
Colloidal radiogold 353
Colloid osmotic pressure 135
Colon 141, 301
Colonic absorption, Na^+, H^+ 141
Communication network 119
Conductance, depolarizing and hyperpolarizing 242
Contractile properties 200
– proteins 319
Contractility 190, 208
Contraction 183, 334
– coupling 284
– in vascular smooth muscle cells 183
– force measurements 44
– staircase 277
– time 68
Cooling 25
– on ^{45}Ca-exchange 183
Corneal epithelium 258
Coronary circulation 147
– flow autoregulation 101
Coupling, cell to cell 119

Crayfish giant axon 273
Cross-bridges 334
Cs on acetylcholine induced current 57
Current recording, high-resolution 85
Current-voltage relationship 57, 277
Cyclic AMP 208

D

Defence reaction 49
Denervated mouse muscles 171
Desensitization 171
Desynchronization 314
Detergent 208
Development 68
Dextran 334
Diclofenac sodium 1
Diffusion distance 22
Disequilibrium pH 159
Distal colon 301
Duration of sleep 314
Dynamic response 163

E

Ear artery 183
Eccrine sweat gland 309
ECG 101
Eicosatetraynoic acid 236
Electrical activity 44, 68
Electrodes 343
Electrogenic pump 119
– sodium pump 261
Electrolyte transport 74
Electro-mechanical uncoupling 44
Electromyographic fatigue analysis 78
Endplate(s) 171, 213
Epicardial ECG 101
Evoked response 154
Excitation 284
–-contraction coupling 277
Excitatory postsynaptic currents (EPSCs) 35
– synaptic channels 35
Exercise 190, 319
– hyperemia 324
Extracellular calcium concentrations 35
– K (Rb) ions 28

F

Facilitation 105
– of acetylcholine release 105
Fast and slow muscles 200
– excitatory synaptic potentials (fast EPSPs) 331
– muscle 338
Fastigal nucleus 267
Fatigue analysis 78
Fatty acids 141
Fever 25
Fleisch transducer 345
Fleisch type pneumotachometers 345
Follicular cell 119
Force-brain 49
Frequency modulation 343
Frog skin 219
Furosemide 309
Fusimotor action 255
– stimulation 163

G

GABA 255
Gamma stimulation 163
Gas exchange in the lung 159
Giant axon 273
Glomerular filtration 296
– function 129
– ultrafiltration 135
Glycerol extracted cardiac muscle 208
Glycogen metabolism 338
Guanine nucleotides 178
Guinea pig atrium 9

H

H_1H_2-antagonism 236
HCO_3 secretion 141
Heart 101
–, hypertrophy 17
–, metabolite release 147
– muscle 57, 277
Heat exposure 25
– production 60
Helix pomatia neurons 252
– (snails) 242
Hepatic clearance 353
– blood flow 353
High altitude 22
– energy phosphates 101
Histochemistry 200
Horseradish peroxidase technique 226
Human lung 178
– sweat glands 309
Humoral immune response 25
Hydraulic microdrive 258
– permeability coefficient 301
Hypercapnia 289
Hyperemia 324
Hyperthermia 25
Hypertrophic rat heart 17
Hyperventilation syndrome 355
Hypocapnia, on cortical blood flow regulation 195
Hypothalamus 25, 49
– cooling 25
Hypoxanthine transport, intestine 41
Hypoxia 17, 44
– in man 289

I

Inactivation process 273
Indocyanine green 353
Indomethacin 1
Inhomogeneity of capillarity 22
Injection of $CaCl_2$ into neurons 242
Innervated rat muscles 68
Inspiration/expiration ratio 236
Insulin release 112
Intercapillary distance 17
Interfilament spacing 334
Internal phase-relationship 314
Intestine 41
Intracellular Ca-stores 183
– free calcium 242
– Na activity (a'_{Na}) 28
– recording 258
Intrapulmonary "compressed air" 236

Ion channels 242
–-selective electrode 242
– transport 301
– – inhibitors 309
Ionic channels 85, 171
– fluxes 112
Isolated dog kidneys 296
– frog skin 219
– pulmonary arteries 231
– rat pancreatic islets 112
Isometric contraction 81
Isoprenalin 355

J

Jejunum in vitro 41

K

K, extracellular, muscle fiber 28
K-induced hyperpolarization 261
K-induced outward current 261
K^+ concentrations rat parotid saliva 74
K^+ depletion process 57
Kidney physiology 129, 135
– tubular reabsorption 296

L

Lactate 101
– /pyruvate ratio 195
Latency-corrected averaging 154
L-glutamine 112
Lithium, replacement of Na^+ 141
L-leucine 112
Lognormal distribution 17
Low-frequency electrical stimulation 200
Lung function method 236
–, human 178

M

Mechanical activity 44
Medullary chemosensitive fields 226
Membrane conductance 171
– – (AH neuron) 331
Membrane current(s) 85, 171
– potential 119
– resistance 119
– voltage 277
Mental arithmetic 81
Metabolism in brain cortex 195
Metoprolol 355
Microelectrode 258
– analysis 44
Microinjections 242
Microperfusion 309
Midbrain of the rat 327
Miniature endplate current frequency 213
Mn ions 105
Motor nerve terminals 306
Muscle, fast and slow 200, 338
– fatigue 78, 200
– fibers 35
– stimulation 68
– spindles 255
Muscimol 255
Myenteric plexus neurons 331
Myocardial activity 147
– capillaries 22

– contractile proteins 319
– contractility 208
– high energy phosphates 101
– protein synthesis 319
– skinned fibres 208
– tissue P_{O_2} 17
Myofibril ATPase 190
Myosin ATPase 190
– light chain components 319

N
Na methanesulfonate solution 171
Na pump 28, 261
Na sensitive microelectrodes 28
Na transport 28, 141, 219
Na^+ and K^+ concentration rat parotid saliva 74
Natriuretic compounds 296
Neck input 267
– vestibular interaction 267
Nerve activity, renal 231
– sprouting 306
– stain 306
– stimulation 1
Neuromuscular junction 213, 306
Neuronal matrix 226
Neurons 242, 252
Newborn innervated rat muscles 68
$NiCl_2$ 242
Nigral output neurons 255
Non-shivering thermogenesis (NST) 125
Noradrenaline-sensitive Ca-store 183
Normoxia 17

O
Onset and duration of sleep 314
Osmotic compression 334
Ouabain 309

P
Pancreatic islets 112
Papillary muscle 277
Parotid saliva 74
Passive hyperthermia 25
– transport components 219
Patch clamp 252
– –, electrodes 35
– – techniques 85
Perineurial sheaths 306
Phenoxybenzamine 1
Phosphocreatine 195
Phosphodiesterase inhibitor IBMX 208
Phrenic nerve afterdischarge 355
Physical training 190
Picrotoxin 255
Pneumotachometers 345
Polyethylenglycol 301
Portal vein 44
Postnatal period 125
Postsynaptic channel 35
Potassium 242
– conductance 219
– current 213
– efflux 213
Postsynaptic potassium efflux 213
Presynaptic acetylcholine receptors 213
Primary muscle spindle ending 163
Prostaglandins 1, 178
Prostaglandin synthesis 296
Pulmonary arteries 231
– artery distension 231
– gas exchange 159
Purines 41
Purkinje fibers 28
Pyrimidines 41

R
Radical scavenger (MK447) 236
Radiogold 353
Rb, extracellular, muscle fiber 28
Receptors 178
Rectal temperature 314
Recovery kinetics 9
Regional blood flow regulation 195
Renal blood flow 1
– function 231
– nerve activity 231
– – stimulation 1
– tubular reabsorption 296
Renin release 1
Repolarization phase 9
Resistance, total peripheral 324
Respiratory gas flow measurement 345
Resting membrane potential 119
Rodent cardiac function 190
Running 190

S
Saliva 74
Sacromere activation 284
Saluretics 219
Scorpion venom 273
Sea anemone toxins 273
Secretin 178
Selective averaging 154
Shivering 81
Short chain fatty acids 141
Short-circuiting effect 261
Silver and cholinesterase stain 306
Signal-to-noise-ratio 154
Single channel Ca^{2+} currents 252
– – recording 85
– nephron glomerular filtration rate (SNGFR) 129
Skeletal muscle 68, 284
Skinned muscle fibers 334
Skin temperatures 327
Sleep 314
Slow inward current 277
– muscle 338
– synaptic potentials 331
Smooth muscle 44
Sodium, colon transport 141
– steady-state luminal concentration 301
Specific membrane resistance 119
Spinal cord thermosensitivity 60
Staircase phenomenon 9
Static fusimotor action 255
Stimulus-secretion coupling 112
Strophanthidin 261
Structural component of resistance 324
Substantia nigra 255
Sweat glands 309
Sympathectomized rats 324
Synaptic transmission 35, 49

T
Telemetry of several biological signals 343
Temperature 183
– -dependence of ^{45}Ca fluxes 183
– on calorigenic action 125
– regulation 60, 81
Tension in skinned muscle fibers 334
– minima 284
Thalamus 327
Thermoresponsive neurons 327
Thermosensitivity 60
Thyroid follicular cells 119
– hormones 125
Thyroxine 190
Tissue O_2 195
– oxygenation 17
Tizolemide 219
Total body thermosensitivity 60
– peripheral resistance 324
Transmitter 343
– release 105
Transmural distribution of myocardial metabolites 101
$Tris^+$ 171
Troponin-Ca^{2+} binding equilibrium 334
– phosphorylation 208
Tubular back-leak 296
– reabsorption 296
Tubulo-glomerular balance 296
– – – feedback mechanism 129

U
Underperfusion 101
Uranyl nitrate 296
Urinary excretion 231

V
Val^5 secretion 178
Vascular smooth muscle 44, 183
– tone 324
Vasoactive intestinal peptide 178
Vasodilator metabolite release 147
– reserve 324
Vasopressin 219
Velocity sensitivity 163
Ventricle function 190
Ventricular heart muscle 277
Veratridine 273
VIP-preferring receptors 178
Visual evoked potentially 154
Voltage clamp 9, 85, 277

W
Water permeability 301
– transport 301
Whole body heat exposure 25

NIH LIBRARY
